

HomEvap Humidifier

The HomEvap Humidifier is a safe and energy-efficient humidifier. Operation is based on the natural process of water evaporation. The humidifier is standard equipped with a Legiosafe® water filter, this guarantee a healthy and safe operation; The built-in heater increases the capacity only if this is necessary. Directly connected to a WTW installation or to be installed between the air ducts.

Advantages: Legionella safe, silent, works automatically, directly connected to HRV or the air ducts.

Description	
Dimensions LxBxH	258 x 344 x 335 mm
Humidification capacity	0-4 litre
Electricity consumption	20 VA, heater active 900VA
Maximum water consumption	5 litre per hour
Water supply connection	¾ internal thread with connection to 4mm
Water drainage connection	15 mm hose grommet 50cm
Maximum air volume	600 m3/u
Duct connection	Standard R200 mm

HomEvap Cooler

The HomEvap Cooler cools the return air your home and work environment and make of the heat exchanger a cold exchanger. This is the intake of outside air extra cooled. The HomEvap Cooler makes the night cooling more effective and cools during the day.

Advantages: quiet, works automatically, directly connected on HRV or between the air ducts.

	HomEvap Cooler
Dimensions LxWxH	258 x 344 x 335 mm
Maximum cooling-capacity	1950 watt
Electricity use	20 VA
Maximum water usage	5 liter per hour
Watersupply duct connector	4 mm
Water drainage connection	15 mm slangtule
Maximum airvolume	650 m3/u
Ductconnection	Standard R200 mm

HomEvap Direct

Do you not have a HRV? Then the HomEvap Direct is the solution for you! The Direct is equipped with a quiet, energy-efficient fan, which allows spreading of chilled humid air through your living and working environment.

The Direct has 2 functions:

- 1 Moisten in the winter
- 2 Cooling in the summer

Advantages: Legionella safe, silent, works automatically

Description	
Dimensions LxBxH	258 x 344 x 335 mm 2x
Humidification capacity	0-4 litre
Maximum cooling-capacity	1950 watt
Electricity consumption	20 VA, heater active 900VA
Maximum water consumption	5 litre per hour
Water supply connection	¾ internal thread with connection to 4mm
Water drainage connection	15 mm hose grommet 50cm
Maximum air volume	600 m3/u
Duct connection	Standard R200 mm

HomEvap Combi Comfort

The Combi Comfort contains both the humidifier as a basic cooler. The Combi Comfort has a controller that automatically controls the humidity and cooling.

An additional advantage is that extra cooling is possible on really hot days, to activate the humidifier next to the cooler!

Advantages: Legionella safe, quiet, energy efficient, more economical than a separate humidifier and cooler, works automatically.
